SUBJECT INDEX

AEROSOL transmission of feline calciviruses. An assessment of its epidemiological importance, 504
Africa, an evaluation of a fence in the control of wild ungulates under extensive conditions in, 379
Agglutinins to common salmonellae in the sera of apparently healthy sheep, 615
Ammonia in the air of animal houses, observations on the correlation between the dung disposal systems and the concentration of, 629
Amniotic and allantoic fluid in goat x sheep hybrid conceptuses, the volume and composition of, 33
Anabolic agents in steers, liveweight gains, blood levels of metabolites, proteins and hormones following implantation of, 62
Anabolic steroid preparations, residue levels of trenbolone and oestradiol-17β in plasma and tissues of steers implanted with, 564
Anaesthesia, influence of general, on peripheral resistance in the horse, 225
Anaesthesia of pigs, pre-slaughter, observations on the use of the Wernberg dip-lift carbon dioxide apparatus, 71
Animal houses, observations on the correlation between the dung disposal systems and the concentration of ammonia in the air, 629
Antibodies active in the indirect haemagglutination test for bovine leptospirosis, an examination of, 17
Arthritic foal, isolation of mycoplasma from, 320
Aureomycin-sulphamethazine supplementation and acquisition of resistance to ovine coccidiosis, relationships between two levels, 166

Babesia ovis infection in splenectomized lambs, studies in imidocarb dihydrochloride in experimental, 609
Bacteriuria, methods to detect significant, 102
Badgers in the South West of England, salmonella infection in, 526
BCG-vaccinated and control cattle, incidence of tuberculosis in relation to age distribution in Malawi, 490
Beef production, individuality and relationships with growth rate observed in the concentrations of certain blood constitutents of bulls and steers reared on three systems of, 175
Beef production, influence of system of husbandry upon the blood composition of bulls and steers reared for, 37
Birds, observations on the use of a semi-automatic system for haematological measurements in, 585
Birds, post-mortem examination of 132 wild, 327
Blood composition of bulls and steers reared for beef production, influence of system of husbandry upon, 37
Blood serum globulins as determined by pregnancy in the domestic donkey, evolution of, 548
Book reviews:
- Colour atlas of neoplasia in the cat, dog and horse (D. E. Bostock & L. N. Owen), 646
- Histology of the fowl (R. D. Hodges), 313
- Husbandry and health of the domestic buffalo (W. Ross Cockrill), 312
- International histological classification of tumours of domestic animals, part II (WHO), 315
- Introduction to animal neurology (A. C. Palmer), 648
- Laboratory non-human primates for biomedical research in the U.K. (K. Hobbs & J. Bleby), 314
- Le Veau (P. Mornet & J. Espinasse), 648
- New concepts of cattle growth (R. T. Berg & R. M. Butterfield), 314
- Practical meat inspection (A. Wilson), 647
- Practice of equine stud medicine (P. D. Rossdale & S. W. Ricketts), 312
- Veterinary toxicology (E. G. C. Clarke & M. L. Clarke), 647
- Vision in the animal world (R. H. Smythe), 313

Brown hare (*Lepus europaeus*), isolation of mycobacteria from, 399
Brucella abortus from contaminated material, a comparison of three selective media for the isolation of, 486
Brucella abortus vaccines, comparison of two challenge strains used to test the potency of, 554
Brucella ovis infection, a comparison of methods for the serological diagnosis of, 442
Brucellae, isolation of, from contaminated sources, a review, 193
Brucellosis in beef cattle in Paraguay, a survey, 405
Bull semen diluents, addition of hydrolytic enzymes to, over a range of spermatozoan concentrations, 9

Campylobacter fetus agglutinins in vaginal mucus from experimentally infected heifers, 88
Cat: aerosol transmission of feline caliciviruses. An assessment of its epidemioligical importance, 504
Cattle:
- breed and sex differences in the age of appearance of the central incisor teeth, 543
- circadian rhythms in the concentrations of thyroid hormone in the plasma of normal calves, 134
- clostridial infection superimposed on contagious pleuropneumonia, 322
- control of fertility, the use of computerized records, 346
- corynebacteria associated with disease of cattle, sheep and goats in Northern Nigeria, 334
- development of an indirect migration inhibition test for use in, using tuberculosis as a model, 374
- diagnosis of bovine salmonellosis I, development of an indirect haemagglutination test, 474
- diagnosis of bovine salmonellosis II, application of the indirect haemagglutination test to the diagnosis of *Salmonella dublin* infection, 509
- effects of body weight changes during the post-partum period in dairy cows on fertility, 635
- efficacy of 4-amino-6 trichloroethenyl-1,3-benzene-disulphonamide against liver fluke in sheep and, 211
- electrophoretic studies of serum proteins in healthy and streptothricosis infected cattle, 106
- examination of the antibodies active in the indirect haemagglutination test for leptospirosis, 17
- experimental *Salmonella dublin* infection in calves, 388
- an improved E rosetting technique for, 432
- incidence of tuberculosis in BCG-vaccinated and control, in relation to age distribution in Malawi, 490
- individuality and relationships with growth rate observed in the concentrations of certain blood constituents of bulls and steers reared on three systems of beef production, 175
- influence of husbandry on colostrum yield and immunoglobulin concentration in beef cows, 120
- influence of system of husbandry upon the blood composition of bulls and steers reared for beef production, 37
- isolation of a strain of *Leptospira* serogroup *icterohaemorrhagiae* from an aborted bovine foetus, 108
- liveweight gains, blood levels of metabolites, proteins and hormones following implantation of anabolic agents in steers, 62
- nature of *Campylobacter fetus* agglutinins in vaginal mucus from experimentally infected heifers, 88
- plasma protein-bound iodine and lipids in genetically different types of cattle grazing in a tropical environment, 579
- possible prophylaxis and model for nutritional degenerative myopathy in young, 535
- production effects of liver fluke I, effects of infection on liveweight gain, feed intake and food conversion efficiency in beef, 145
- pulmonary fascioliasis in Sudanese, 316
- residue levels of trenbolone and oestradiol-17β in plasma and tissues of steers implanted with anabolic steroid preparations, 564
- sensitivity patterns of *Escherichia coli* isolated from calves during and following prophylactic chlortetracycline therapy, 340
- serological response to salmonella infection, 25
- sequence of myodegeneration in nutritional myopathy of the older calf, 160
- slurry, effect of microflora on the survival of *Salmonella dublin*, 1

study of the epidemiology of fascioliasis in Kenya and its control using N-tritylmorpholine, 600
survey of brucellosis in beef cattle in Paraguay, 405
teat shape and production associated with opening and prolapse of the teat orifice in Friesian cows, 258
teat shape, teat cup crawl and milk production in Guernsey and Australian Illawarra shorthorn, 454
tuberculin reactions in BCG-vaccinated, 642
vaccination control of an outbreak of *Salmonella typhimurium* infection in suckler cows and calves, 239
Cephalothoracopagus, a case of monster twinning in the pig, 530
Chicken and turkey plasma, estimation of prothrombin time using a phenol-saline thromboplastin or Russell-viper venom, 623
Chlortetracycline therapy, sensitivity patterns of *Escherichia coli* isolated from calves during and following prophylactic therapy, 340
Circadian rhythms in the concentration of thyroid hormone in the plasma of normal calves, 134
Clostridial infection superimposed on contagious bovine pleuropneumonia, 322
Colostrum yield and immunoglobulin concentration in beef cows, influence of husbandry on, 120
Computerized records, the use of in control of cattle fertility, 346
Congenital defect in iodothyronine synthesis, clinical aspects of iodine metabolism in goats with congenital goitre and hypothyroidism, 495
Congenital tremor syndrome of piglets, neurochemistry as a diagnostic aid, 111
Copper, influence of levels of dietary protein and supplementary, on the performance of growing rabbits, 593
Copper toxicity, I, 219; II, 365
Corynebacteria associated with diseases of cattle, sheep and goats in Northern Nigeria, 334

DEER, observations on the weighing of park, 215
Diamphenethide against *Fasciola hepatica* in sheep, efficiency of, 458
Disinfection of animal viruses, 356
Dog: isolation of *Torulopsis glabrata* from a urine specimen of a labrador bitch with urolithiasis, 324
Donkey, evolution of blood serum globulins as determined by pregnancy in the domestic, 548
Drug resistance in salmonellae isolated from animals in England and Wales during 1973 and 1974, a survey, 292
Dung disposal systems and the concentrations of ammonia in the air of animal houses, observations on the correlations between the, 629

Eimeria zuernii, proposed life cycle of, 471
Electron microscopy in the rapid diagnosis of orf, 81
E rosetting technique for cattle, an improved, 432
Escherichia coli isolated from calves during and following prophylactic chlortetracycline therapy, sensitivity patterns of, 340
Escherichia coli strains, some characteristics of pathogenic, 572
Ethiopia, Central Highlands, epidemiology and anthelmintic control of ovine fascioliasis in, 273

Fasciola hepatica in sheep, the efficiency of diamphenethide against, 458
Fascioliasis:
effect of control of chronic, on productivity of lowland sheep, 518
in the Ethiopian Central Highlands, the epidemiology and anthelmintic control of ovine, 273
in Kenya and its control using N-tritylmorpholine, a study of the epidemiology of bovine, 600
in the North, East and West of Scotland, a five-year study of the epidemiology of, 263
in Sudanese cattle, pulmonary, 316
Fertility, control of cattle; the use of computerized records, 346
Fertility, effects of body weight changes during the post-partum period in dairy cows, 635
Fertilization, ovulation, early embryonic development and establishment of pregnancy in pigs, physiological factors influencing, 461

GEORGE Fleming Prize, 224
Goats:
clinico-pathological changes associated with experimental *Schistosoma mansoni* infection in, 201
congenital defect in iodothyronine synthesis, clinical aspects of iodine metabolism in congential goitre and hypothyroidism, 495
corynebacteria associated with disease of cattle, sheep and, in Northern Nigeria, 334

HAEMATOLOGICAL measurements in birds, observations on the use of a semi-automatic system for, 585
Horses:
influence of general anaesthesia on peripheral resistance, 225
isolation of mycoplasma from an arthritic foal, 320
studies of left ventricular isotonic function in conscious and anaesthetized ponies, 446

IMIDOCARB dihydrochloride in experimental *Babesia ovis* infection in splenectomized lambs, studies on, 609
Immunoglobulin concentration and colostrum yield in beef cows, influence of husbandry on, 120
Indirect haemagglutination test, application to the diagnosis of *Salmonella dublin* infection, diagnosis of bovine salmonellosis II, 509
Indirect haemagglutination test, development of, diagnosis of bovine salmonellosis I, 474
Indirect haemagglutination test for bovine leptospirosis, an examination of the antibodies active in, 17
Indirect migration inhibition test for use in cattle using tuberculosis as a model, the development of, 374
Iodine, plasma protein-bound, and lipids in genetically different types of cattle grazing in a tropical environment, 579
Iodothyronine synthesis, congenital defect in, clinical aspects of iodine metabolism in goats with congenital goitre and hypothyroidism, 495

KENNEL runs, a new approach to the control of *Toxocara canis* and other parasitic ova on concrete-floored, 427
Kenya, a study of the epidemiology of bovine fascioliasis and its control using N-tritylmorpholine, 600

Leptospira serotype *icterohaemorrhagiae* from an aborted bovine foetus, isolation of a strain of, 108
Leptospirosis, an examination of the antibodies active in the indirect haemagglutination test in bovines, 17
Lipids and plasma protein-bound iodine in genetically different types of cattle grazing in a tropical environment, 579
Liver fluke in cattle, production effects of I, effects of infection on liveweight gain, feed intake and food conversion efficiency in beef cattle, 145
Liver fluke in sheep and cattle, efficacy of 4-amino-6 trichloroethenyl-1,3-benzenedisulphonamide against, 211
Lumpy skin disease in the Sudan, investigations of the first outbreaks, 184

MALAWI, incidence of tuberculosis in BCG-vaccinated and control cattle in relation to age distribution in, 490
Metabolic harness for female sheep, inexpensive, 483
Milk ejection failure, some behavioural aspects in sows, 126
Milk production, teat shape and teat cup crawl in Guernsey and Australian Illawarra shorthorn cows, 454
Mycobacteria, isolation from the brown hare (*Lepus europaeus*), 399
Mycoplasma from an arthritic foal, isolation of, 320
Myodegeneration in nutritional myopathy of the older calf, the sequence of, 160
Myopathy in young cattle, a possible prophylaxis and model for nutritional degenerative, 535

NIGERIA, corynebacteria associated with disease of cattle, sheep and goats in Northern, 334

OCHRATOXIN, effect of feeding to pigs during early pregnancy, 412
Orf, electron microscopy in the rapid diagnosis of, 81

Ostertagia circumcincta in lambs, the effect of different levels of larval intake on the output of eggs by, 360
Ovulation, fertilization, early embryonic development and establishment of pregnancy in pigs, physiological factors influencing, 461
Oxaluria in pigs, studies on experimental, 418

PARAGUAY, a survey of brucellosis in beef cattle in, 405
Peripheral resistance in the horse, influence of general anaesthesia, 225
Pigs:
- analysis of autopsy data on respiratory disease by multivariate methods, 281
- a case of monster twinning (cephalothoracopagus) in, 530
- effect of feeding ochratoxin during early pregnancy, 412
- influence of rapeseed and mustard seed meals on reproductive efficiency in gilts, 46
- neurochemistry as a diagnosis aid in the congenital tremor syndrome of piglets, 111
- observations on the use of the Wernberg dip-lift carbon dioxide apparatus for pre-slaughter anaesthesia, 71
- physiological factors influencing ovulation, fertilization, early embryonic development and establishment of pregnancy in, 461
- some behavioural aspects of milk ejection failure, 126
- studies on experimental oxaluria in, 418

Pleuropneumonia, clostridial infection superimposed on contagious bovine, 322
Post-mortem examination of 132 wild birds, results of, 327
Pregnancy in the domestic donkey, evolution of blood serum globulins as determined by, 548
Pregnancy, effect of feeding ochratoxin to pigs during early, 412
Pregnancy in pigs, establishment of and physiological factors influencing ovulation, fertilization, early embryonic development and, 461
Proceedings of the Society for Veterinary Ethology, July 1965, 95; December 1975, 190
Protein, influence of levels of dietary, and supplementary copper on the performance of growing rabbits, 593
Prothrombin time of chicken and turkey plasma using a phenol-saline thromboplastin or Russell-viper venom, the estimation of, 623
Pulmonary adenomatosis or other chronic pulmonary disease, long-term serum protein values in sheep with, 56
Pulmonary adenomatosis, serum protein pattern in tumour extract from sheep affected with, 231
Pulmonary fascioliasis in Sudanese cattle, 316

RABBITS, influence of levels of dietary protein and supplementary copper on the performance of growing, 593
Rapeseed and mustardseed meals on reproductive efficiency in gilts, the influence of, 46
Respiratory disease, pig, analysis of autopsy data by multivariate methods, 281

Salmonella dublin infection in calves, experimental, 388
Salmonella dublin, effect of microflora on the survival of, in cattle slurry, 1
Salmonella infantis, experimental infection of sheep with, 435
Salmonella infection in badgers in the South West of England, 526
Salmonella infection, serological response in cattle, 25
Salmonella typhimurium infection in suckler cows and calves, vaccination control of an outbreak of, 239
Salmonellae isolated from animals in England and Wales during 1973 and 1974, a survey of drug resistance, 292
Salmonellae in the sera of apparently healthy sheep, agglutinins to common, 615
Salmonellosis, diagnosis of bovine, II, application of the indirect haemagglutination test to the diagnosis of *Salmonella dublin* infection, 509
Salmonellosis, diagnosis of bovine, I, development of an indirect haemagglutination test, 474
Schistosoma mansoni infection in the goat, clinico-pathological changes associated with experimental, 201
Scotland, a five-year study of the epidemiology of fascioliasis in the North, East and West, 263
Serological diagnosis of *Brucella ovis* infection, a comparison of methods for the, 442
Serum protein values in sheep with pulmonary adenomatosis or other chronic pulmonary disease, long-term, 56
Serum protein pattern in tumour extract from sheep affected with pulmonary adenomatosis, 231
Serum proteins in healthy and streptothricosis infected cattle, electrophoretic studies of, 106
Sheep:
- acid-base status, salivary Na/K and electrolyte excretion, with differing sodium appetite, 245
- agglutinins to common salmonellae in the sera of apparently healthy, 615
- corynebacteria associated with disease of cattle, sheep and goats in Northern Nigeria, 334
- effect of control of chronic fascioliasis on the productivity of lowland, 518
- effect of different levels of larval intake on the output of eggs by *Ostertagia circumcincta* in lambs, 360
- effect of resistance on the faecal egg output and on pasture larval infection, 559
- efficacy of 4-amino-6 trichloroethenyl-1,3-benzene-disulphonamide against liver fluke in cattle and, 211
- efficiency of diamphenethide against *Fasciola hepatica* in, 458
- epidemiology and anthelmintic control of fascioliasis in the Ethiopian Central Highlands, 273
- experimental infection of, with *Salmonella infantis*, 435
- inexpensive metabolic harness for female, 483
- long-term serum protein values in pulmonary adenomatosis or other chronic pulmonary disease, 56
- relationships between two levels of aureomycin-sulphamethazine supplementation and acquisition of resistance to coccidiosis, 166
- serum protein pattern in tumour extract from sheep affected with pulmonary adenomatosis, 231
- studies on imidocarb dihydrochloride in experimental *Babesia ovis* infection in splenectomized lambs, 609
- volume and composition of amniotic and allantoic fluid in goat × sheep hybrid conceptuses, 33

Sodium appetite, acid-base status, salivary Na/K and electrolyte excretion in sheep with differing, 245
Spermatozoan concentrations, addition of hydrolytic enzymes to bull semen diluents over a range of, 9
Sudan, investigations of the first outbreaks of lumpy skin disease, 184
Sudan, pulmonary fascioliasis in cattle, 316

TEAT shape and production associated with opening and prolapse of the teat orifice in Friesian cows, 258
Teat shape, teat cup crawl and milk production in Guernsey and Australian Illawarra shorthorn cows, 454
Teeth, breed and sex differences in the age of appearance of the bovine central incisor, 543
Thyroid hormone in the plasma of normal calves, circadian rhythms in the concentration of, 134
Torulopsis glabrata from a urine specimen of a labrador bitch with urolithiasis, isolation of, 324
Toxocara canis and other parasitic ova on concrete-floored kennel runs, a new approach to the control of, 427
Trichinella spiralis larvae, recovery of, 318
Tuberculin reactions in BCG-vaccinated cattle, 642
Tuberculosis, incidence of in BCG-vaccinated and control cattle in relation to age distribution in Malawi, 490
Tuberculosis as a model in the development of an indirect migration inhibition test for use in cattle, 374

UNGULATES, an evaluation of a fence in the control of wild, under extensive conditions in Africa, 379
Urolithiasis, isolation of *Torulopsis glabrata* from a urine specimen of a labrador bitch with, 324

VENTRICULAR isotonic function in conscious and anaesthetized ponies, studies of left, 446
Viruses, disinfection of animal, 356

WERNBERG dip-lift carbon dioxide apparatus, observations on the use of for pre-slaughter anaesthesia in pigs, 71
